What's New:

The following features have been added to vSpace Server with this build:

Support for MAX distribution

This release introduces support for MAX 6.5 and MAX 7 distributions of Linux.

Fixed in This Release:

The following known issues have been resolved with this release of vSpace Server for Linux:

System Shutdown via Remote Session LTSL-935, LTSL-1046

Non-admin/root users were previously able to shut down the host system via remote sessions. This has been resolved, and is no longer possible.

LDAP Authentication Not Possible LTSL-991

LDAP authentication was previously not possible due to a missing username field. This has been resolved.

F7 key Sending F9 Keystroke LTSL-1000

The F7 key was previously sending an F9 keystroke. This has been resolved.

MAX 6.5 Automatic Updates LTSL-986

Automatic updates within MAX 6.5 are now disabled upon installing vSpace Server. This prevents the OS from becoming incompatible with vSpace due to automatic updates.

MAX 7 Automatic Updates LTSL-987

Automatic updates within MAX 7 are now disabled upon installing vSpace Server. This prevents the OS from becoming incompatible with vSpace due to automatic updates.

Ubuntu 10.04 Automatic Updates LTSL-984

Automatic updates within Ubuntu 10.04 are now disabled upon installing vSpace Server. This prevents the OS from becoming incompatible with vSpace due to automatic updates.

Ubuntu 12.04 Automatic Updates LTSL-985

Automatic updates within Ubuntu 12.04 are now disabled upon installing vSpace Server. This prevents the OS from becoming incompatible with vSpace due to automatic updates.

NC-Console Session Viewing LTSL-902

Previously, upon successfully viewing a session remotely via NC-Console, all subsequent attempts to view the session would fail. This has been resolved.

Auto Login Resets System Language to English LTSL-897

Previously, configuring Auto Login would cause the system language to switch to English. This has been resolved and enabling Auto Login should not affect the system language settings.
