

## Important Notice – July.6 2010

**NOTE:** When you use IP Utility V3.5.25 to update the profile pack on your device, please check the firmware compatible table first. You can click [HERE](#) to download the latest **Profile Pack** directly.

	Firmware Version		
	ACM	ACD Video Server	TCM & TCD
IP Utility V3.5.25	V3.09.14 and above	V3.11.11 and above	V4.06.09 and above

For TCM-5311, we use independent video setting for Day and Night on the new profile, and the new function must work on firmware v4.07.15 above. Please must upgrade the firmware to v4.07.15 above first, and then update the ProfilePack\_V1.04.02.

### How to update the profile pack on your camera

- **STEP1:** Run IP Utility V3.5.25.
- **STEP2:** Please click [HERE](#) to download the latest profile pack.

(We already include a profile pack file “ProfilePack\_V1.04.02.bin” in IP\_Utility\_v3.5.25-AC.zip)

- **STEP3:** Upgrade the profile pack on your camera.

**Profile Upgrade:** This will display a dialog window that asks you to select a profile pack file to use.

After you've selected the proper file, click apply to proceed. The profile pack contains necessary profiles for all devices, and will automatically match the proper profile to each device. This means there's no need to choose a different profile for each device anymore.
